

Dear Partner,

We are pleased about your interest regarding the PUDO partner interface solution.

Key information regarding the system:

- Parcel barcode is to be maximum of 25 characters. The preferred code type is CODE 128.

Barcode generation: PREFIX + 191002 (191002=Y/MM/DD) + dynamically ascending number.

SPT191002123654

In case of more than 1 parcel is to be shipped for the same addressee, then the barcode should be followed by -2; -3 etc.

SPT191002123654-2; SPT191002123654-3

- The development for connecting Sprinter is processed on the following levels:
- Testing system (Business test):

Order creation access path for interface test:

<https://tsx.lapker.hu/PudoTest/PartnerPudoService?singlewsdl>

Document creation access path interface test:

<https://tsx.lapker.hu/PudoTest/PudoDocumentService?singlewsdl>

The Partner specific ID for the testing and all the necessary information will be provided by our IT Support Team. Please contact our colleagues at pudointerface@lapker.hu - provide us with your partner name -. Once this step is successfully passed, then you will be able to connect to the production environment.

- Physical test

Based on the decision of Sprinter's Business Department, it is necessary to have a final physical test in the real system, if the transport documents are not generated in Sprinter's systems.

Should you have any questions, please do not hesitate to contact us.
